

Indus Net Technologies is set to participate in Asia Pacific's largest platform for ICT Industry- CommunicAsia2017 in Singapore

~ To showcase ways IoT raises technological efficiencies in businesses and everyday life ~

Kolkata, May 5, 2017: Indus Net Technologies (INT), an eminent name in the data analytics and digital marketing industry in the country, is yet again set to participate in the esteemed CommunicAsia2017 to be held from Tuesday, 23rd May to Thursday, 25th May, 2017 at the Marina Bay Sands, in Singapore. The CommunicAsia is amongst the largest platforms organized for the ICT industry in the Asia-Pacific region and draws global industry brands to showcase key and emerging technologies.

At CommunicAsia2017, **Indus Net Technologies** will showcase how the latest technologies in Internet of Things (IoT), M2M, Mobile Apps, and more, will raise technological efficiencies in businesses and everyday life. Through its participation and interaction with more clientele and associates, it looks forward to further grow its ever-expanding mark in the business.

Mr. Abhishek Rungta, CEO, Indus Net Technologies, commented on the same, *"The nature of our industry is such that we need to stay abreast of all the recent developments. The growth of the industry is dependent on exchange of ideas from various players. Traditional industries are undergoing massive changes with IoT disrupting the world's way of working. In such an environment, it is essential to keep oneself upgraded with the latest innovations and share knowledge of one's own innovations. Being a part of CommunicAsia is an excellent window of opportunity for this."*

CommunicAsia2017 has been showcasing products like broadband services, cloud computing services, connections, connected devices, connected home devices, content management, content security management, mobile marketing services, mobile applications and services, mobile devices and components, smart phones, satellite communications, satellite technologies and other products and services etc. in the Computer Hardware & Software, Telecom Products & Equipment industries ever since its inception in 1979.

The premier sourcing and knowledge ICT platform in Asia, CommunicAsia2017 brings together a comprehensive and converging display of cutting-edge technologies, which disrupt traditional business models and ensure that businesses stay updated and ready to tackle future consumer demands. Headquartered in Kolkata and founded by Mr Abhishek Rungta, Indus Net Technologies so far has already developed and deployed more than 1000 enterprise apps and is involved in a continuous process of the innovative web and mobile application development. The company has a presence in Singapore since 2012.

About the Company: Indus Net Technologies is a 19 years old innovative IT Service, managed Outsourcing and Internet Strategy company that offers services like Enterprise Mobility , Cloud/Web Application Development and Digital Marketing.
