Kolkata (West Bengal) [India], February 24 (ANI/PRNewswire): Analytics is getting more prevalent and the necessities of organization will constantly change. INT. (Indus Net Technologies) has dynamic goals to align INT. V.3.0 on a growth path. One of the key objectives is to step into Analytics/BI, ML/AI as a service domain.

Data Science prioritizes vivid analytics, which provides a summary of past and present data to display what has happened or what is presently happening. It also focuses on predictive analytics, which uses data mining, modeling, and machine learning to determine the probability of future outcomes.

Artificial intelligence and Machine Learning play an extremely important role in automation.

"Though we have used some technologies on-and-off in different projects, it was important to create a centre of excellence (CoE) for this very important vertical," informs Abhishek Rungta, Founder & CEO, INT.

New technologies, reasonable demands, augmented user skills are driving a new motivation on the role of the analytics centre of excellence (CoE). "On Feb 1, 2021, we initiated a special CoE on Analytics/BI, ML/AI," he added.

With the help of predictive analytics, now it's possible to provide personalized health care services to individual patients and enhance education. Under the category of banking and finance, it assesses credit risk involved in lending finances to individuals and improves the supply strategies and product quality in the manufacturing sector. Moreover, it helps to optimize functions, enhance employee productivity and minimize risks in the business operations.

"With analytics as one of our emerging segments, INT. would be focussing more on solving business problems rather than building complex Data Science models. Our objective would be to assist business organizations to achieve their goals through data-driven culture," explains CA Dipak Singh, Data Scientist, Head of Analytics, INT.

"We expect over time the scope and size of the team to grow rapidly. This team is to be one of the fastest-growing business teams within INT.," mentioned Rungta. "We have created a dedicated team with members who come with a lot of experience in data science and deep domain knowledge. Some of our pilot projects on Banking & Finance, Hotel & Restaurant, Career Discovery, E-Commerce, and HR- IT & MNC are in process."

"Our key clients are expected to come from our key domain of BFSI, Life Sciences, and Retail. We will also be developing tools/IP/products at the confluence of technology, marketing, and analytics within the next few years," he concluded.

✉ Dear Reader,

Business Standard has always strived hard to provide up-to-date information and commentary on developments that are of interest to you and have wider political and economic implications for the country and the world. Your encouragement and constant feedback on how to improve our offering have only made our resolve and commitment to these ideals stronger. Even during these difficult times arising out of Covid-19, we continue to remain committed to keeping you informed and updated with credible news, authoritative views and incisive commentary on topical issues of relevance.

We, however, have a request.

As we battle the economic impact of the pandemic, we need your support even more, so that we can continue to offer you more quality content. Our subscription model has seen an encouraging response from many of you, who have subscribed to our online content. More subscription to our online content can only help us achieve the goals of offering you even better and more relevant content. We believe in free, fair and credible journalism. Your support through more subscriptions can help us practise the journalism to which we are committed.
