

# OUTSOURCING FOR PROFIT Make Your Investment Count

# 2021: New dynamics for IT Outsourcing Industry

Copyright © 2021 / +91-98311 48300 / info@indusnet.co.in

2020 has witnessed the speed of change that COVID-19 has brought into the world. As pandemic unfolded, it has elevated the urgency of companies becoming flexible and responsive to sudden shocks like this.

As we slowly settled into the 'new normal', we are concerned with how IT companies are serving their clients! Are they finding pragmatic solutions to support their clients? Or are they feeling the heat from the clients for missing the Service Level Agreement (SLAs) and deadlines?

Initial pandemic days went against IT outsourcing and reduced the value by 5% as incoming of the projects started to decline and companies facing reduced revenue. But, as companies started accelerating their digital adoption, it has "reinforced the benefits of IT outsourcing" to weather the future disruption.

# Key Insights: 2021 IT Outsourcing

The Global IT outsourcing market was valued at

## \$333.7 bn

in **2019** 

and it is expected to reach

## \$397.6 bn

#### by **2025**

registering a CAGR of

4.5%

during the forecast period (2020 - 2025)

The value of IT services companies delegate to external suppliers may exceed

## \$413.72 bn

by the end of **2021** says Statista

Application development is one of the most frequently outsourced IT functions in 2021.

More than

60%

of tech companies are outsourcing at least a part of their application development.

in **2019** to 13.6%

#### Despite the lockdown, the total IT budget rose from

## 12.7%

# in **2020**

The pandemic led disruptions has led companies to scramble for stability from operational point of view. Covid-19 has made sure that diversification can help companies in staying resilient throughout the challenging period.

2020 has uncovered the risk associated with "putting all eggs at one place". Risk mitigation can be done with the help of diversifying. Today there are certain key areas, on which companies must focus to mitigate the risk through diversification. They are:

#### Time zone

#### COST EFFECTIVENESS

## There can be hidden cost associated with currency fluctuation , different time zone delays, travel restrictions and sudden requirements of the resources. Companies must follow balance strategy between cost savings and risk.

#### Subscription Based Service

Copyright © 2021 / +91-98311 48300 / info@indusnet.co.in

#### Tailored Service

## AGILITY & RESILIENCE

Remote Workforce Model

## Bringing resilience comes with agility. Companies must understand that the concept of "one-size-fits-all" has long gone! Today the time has come for "subscription as-a-service". Clients will pay for the amount of work needed and there is an option for flexibility too. Companies must also consider "remote workforce" model for the time of new normal.

#### Capability

#### **Talent Pool**

resources catering to various technology problems

#### Learning Curve

The learning curve effect reduces the turn around time and enhances the quality of the delivery

Outsourcing provides easy onboarding facility through their flexible model at a fraction of the hiring cost.

Faster remote work delivery as productivity in virtual team isn't affected.

45% companies are outsourcing to ramp up modern technology solution faster.

Hiring offshore developers can reduce associated cost like office space, rent, property tax etc.

> Shared risk as outsourcing partners equally bear the risk with partner company.

Establishing trust on scalable external team supported with innovative tech stacks, security policies and standards compliance for remote business support.

# Four Step Process to Assess, Analyse, Evaluate & Optimise Your IT outsourcing

In a 4- Step Process Model, we are building a framework to evaluate every decision before looking for IT outsourcing. As companies are looking for increasing efficiency and optimising cost through outsourcing, but handing over crucial activities to "lower cost specialist" can create a repelling effect. Thus it is important to Assess, Analyse, Evaluate and optimise your IT outsourcing.

# **Evaluate the Partnership:** Strategic Vision

Evaluating partnership is the next step after deciding on IT outsourcing. This is the most crucial stage for a business to be successful.

Listing down all potential vendors and collecting data points for vendor rating helps in identifying the best partnership for your company.

Gartner vendor rating tool helps us in achieving a balanced provider portfolio. It gives us a holistic view on providings of the vendor and how it aligns our business.

| eak | Caution | Variable | Positive | Strong |
|-----|---------|----------|----------|--------|
|     |         |          |          |        |
|     |         |          |          |        |
|     |         |          |          |        |
|     |         |          |          |        |
|     |         |          |          |        |
|     |         |          |          |        |

**Strong:** Customers can feel comfortable investing in a continued relationship with this provider. Potential customers should consider this provider a strong choice for new strategic investments.

**Positive:** Customers should continue planned investments. Potential customers should consider this provider a viable choice for strategic or tactical investments, while planning for known limitations.

Variable: Customers should consider the short- and long-term impact of possible changes in status. Potential customers should factor issues and opportunities related to the ongoing evolution and maturity of this provider into their decisions.

**Caution:** Customers should understand challenges in relevant areas and develop contingency plans based on risk tolerance and possible business impact. Potential customers should consider the provider's challenges in their due diligence.

**Weak:** Customers should execute contingency options. Potential customers should consider this provider only for tactical investments with rapid payback.

# Evaluate the Right Partnership via Scorecard

The weighted-average methodology is another method to score the vendors based on the following criteria such as :

#### **Basic preliminary check**

It relates to the Vendor experience and technical capabilities

#### **Project Delivery**

Measures the turnaround time, delivery process and also the process

#### Pricing

The type of payment structure followed, the pricing model and the competitive rate.

#### Legal

Measures the compliance and security strategy of the vendor.

#### IT solutions

Measures the robustness and the scalability of the development and testing strategy.

## Define the parameters, sub-parameters and assign a score to each of them

# Optimizing the Partnership to Improve Efficiency

In the optimisation phase, companies must look for cost optimization along with maintaining the quality of the work. A cost optimization is not the only reason companies are looking to for outsourcing. Cost optimization cannot be the roadblock to innovation. Today companies are more inclined towards IT outsourcing for the access to the huge talent pool, speed and agility.

Copyright © 2021 / +91-98311 48300 / info@indusnet.co.in

## "As per a Deloitte study, 64% of the companies consider cost-savings as the primary factor driving them towards outsourcing."

## To optimise partnership, the following checklist has been made:

Understand your spending analysis on vendors

Check your profile with each vendor based on the historical spending and expected spending

To keep the vendors competitive, assign stakeholders to analyse their performance and review it quarterly

Copyright © 2021 / +91-98311 48300 / info@indusnet.co.in

creation too

Identify the vendors who are benefiting more than creating resistance

Identify the preferred vendors and risk associated with the transition

We are a team of digital engineers working towards innovation, reinvention and reshaping business models. We cater to multiple enterprise clients, fast growing product companies, digital agencies operating in the domain of banking, insurance, finserve, health, professional services and others in more than 45 countries.

We Deliver #DigitalSuccess
